WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.  
PCT/IL05/00140

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1-8</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-8</u>	NO
Industrial applicability (IA)	Claims <u>1-8</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-8 lack novelty under PCT Article 33(2) as being anticipated by Erlandson. As broadly claimed, Erlandson teaches a frame 10, an actuator 12 that includes a movement mechanism capable of applying a force that interacts with a motion of the patient's limb in a volume of at least 30 cm. The program in which selected to perform an exercise routine would prevent substantial motion in any point in any direction that is not in the desired exercise routine. A joint 34 allows multiple relative placements of the end effector. The device includes at least one sensor 36 to report the location of the joint.

Claims 1-8 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
